The Baker's Puzzle

This is your free McVitie's Baker's Puzzle which should not only keep you occupied for hours but given proper care should give you hours of amusement. Below are listed a few tips on how to look after your game and get the most out of playing it.

Care of Your Game

Your Baker's Puzzle consists of a board and playing pieces.
The playing pieces are supplied attached to each other in a complete sheet.

IMPORTANT!

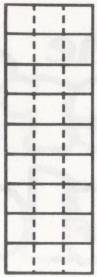
To separate the pieces from the sheet DO NOT TEAR. Carefully take the sheet and hold it so that the printed side is facing away from you, then bend the pieces towards you and snap them apart. Should a piece not separate easily use scissors or a sharp knife.
To stick the pieces to the board simply press each piece onto the playing surface, white side down. Make sure each piece is pressed firmly onto the board, otherwise they may become detached from the board.

After use make sure all pieces are firmly stuck by closing the board and press the covers together. Should the pieces or board lose their adhesion try cleaning them with a slightly damp cloth and dry afterwards.

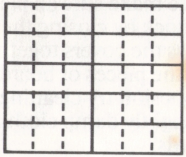
How To Play

In each game you must set out the pieces in a particular way. To make it easy to lay out each game we have given a diagram overleaf of how to set up each one. When playing, try using the tiles vertically, horizontally and upside down.

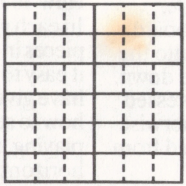
Game 1
Using red tiles make a rectangle 3 symbols across and 9 down.



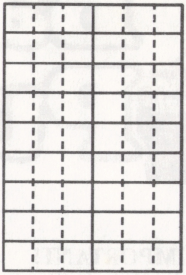
Game 2
Using yellow tiles make a rectangle 6 symbols across and 5 down.

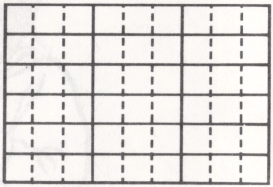


Game 3
Using red tiles make a square 6 symbols across and 6 down.

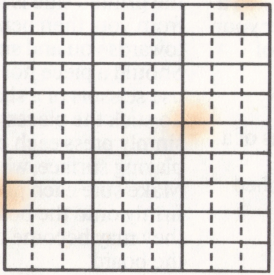


Game 4
Using red and yellow tiles make a rectangle 2 tiles across by 9 down.





Game 5
Using all the red and yellow tiles make a rectangle 3 tiles across and 6 down.



Game 6
Using all the 27 tiles arrange them into a square 9 symbols across by 9 down.
